

ERODING

Coastal Preservation & Artificial Beaches

People are designing artificial beaches and reefs to mimic natural shores and reduce the effect of coastal erosion. Do you think we should focus on artificial initiatives? Or on preserving the land we already have?

RAPID

Increasing Rate of Coastal Migration

Throughout the Earth's history, the rate of coastal migration has never been as rapid as it is today. Think of what is making this change so rapid. What steps can we take to mitigate the process?

HOME 

Local Biodiversity and Ecosystems Lost

Reflect on the way the critters in your game have been. Have any of them lost their habitats? The rapid rate of modern shoreline migration can be disastrous to ecosystems. What are some steps you can take to protect your local biodiversity?
